Dear All,

This is to inform that we just experienced a powerful earthquake in West Sumatera on Wednesday, September 30, 2009 at 17:16pm Western Indonesian Time.

The epicenter of 7.6-magnitude quake was 71 kilometers under the sea level of Indian Ocean, 57 kilometers South West of Pariaman, a small coaster city around 70 kilometers North West of Padang city, the capital of West Sumatera province. The Indarung plants site (PT Semen Padang) is around 14 kilometers East of Padang city or some 104 kilometers away from the epicentrum of the earthquake.

We are currently in the process of assessing the impact of the earthquake at our operations at PT Semen Padang. We believe that over the next couple of days we will be able to provide further details on the same.

Thank you.

Regards,

Agung Wiharto
